

Joint Stock Company "ELECTROTEHNICA» Address: Stefan cel Mare, 160, Balti. Republic of Moldova, MD-3121 tel.: (+373 231) 2-33-45 fax: (+373 231) 2-25-32 Alexander Valeanu Born on May 10th, 1960, in Ungheni town Electrical engineer, had graduated from Kishinau Polytechnic Institute (1983). From 2005, director of the JSC «Electrotehnica». In our days, man is trying to replace manual efforts with intellectual ones or to shift off hard work to machines. The spheres requiring application of considerable physical forces had been reorganized many years ago. Various machines cope easily with complex and intricate problems modern society is encountered with. Plant «Electrotehnica» from Balti resolves successfully such problem.

«Electrotehnica» JSC was created in 1995 on the basis of Balti electromechanical plant. It specializes in production of electric loaders, engines and spare parts for loaders. Also, it produces electric equipment and various consumer goods. Production areas of the plant occupy 20.600 sq.m, whereas storing premises are located at the territory of approximately 2 hectares. Besides electric loaders, «Electrotehnica» produces hydraulic trucks with manual control (load carrying capacity - 1.250 kg), hydraulically driven piling trucks, pumps of VR-3 type, as well as

disk-crowfoot and disk-toothed rollers intended for needs of agricultural and industrial complex. Manufactured products are certified, have taken strong positions both at domestic and external markets and are exported far abroad. «Electrotehnica» JSC is going on with mastering the production of new types of machines, electric equipment, agricultural devices and consumer goods. Machines and electric equipment manufactured by the enterprise were widely presented at international exhibitions and fairs in Germany, Turkey, Denmark, Yugoslavia, Austria, Bulgaria, Czechoslovakia, where invariably obtained high estimates of specialists and potential users.
