National Institute of Standardization and Metrology Address: Eugen Coca, 28, Chisinau, Republic of Moldova, MD-2064 tel.: (+373 22) 74-85-42 Fax: (+373 22) 24-54-14 E-mail: insm@standard.md http://www.insm.standard.md Alexander Tarlajanu Born on March 1st, 1952, in Cucoara village, Cahul district Engineer, had graduated from Kishinau Polytechnic Institute (1974). Doctor of technical sciences. From 2002 - the general director of NISM. Author of 6 patented inventions. National Institute of Standardization and Metrology (NISM) was created in 2002 through reorganization of the former National Standardization, Metrology and Certification Center.

It performs scientific and practical works directed toward implementing in the Republic of Moldova of unified policy in the field of standardization, metrology and evaluation of conformity. It provides under request of economic agents and private persons services of meteorological verification and attestation of measuring instruments, as well as laboratory tests of industrial, agricultural and food products, certification of products, etc. Providing services of technical examination and control of normative documents, NISM assures compliance with
requirements of applicable standards and technical regulations. NISM has its central office in Kishinau city and branches in Cahul and Causeni towns. Its activity is ensured by approximately 300 specialists being highly qualified experts able to resolve problems concerning implementation of national, international and regional standards and to assure conformity of goods. Institute is an exclusive owner, manager and distributor of the national fund of normative acts in the field of standardization, metrology and assessment of conformity. Also, it is the principal executor of the program of development of the National System of Standards for the period of 2003-2008, is an owner of the National Standard of electric resistance of constant current, as well as of 65 retention-comparison standards of the Republic of Moldova. NISM participates actively in regional and international cooperation in the field of its activity. NISM activity is constantly improved on the basis of the Quality Management System and in conformity with international standards ISO of 9000:2000 series.
