From 1995 - director of «Produce Cere-aliere» JSC. The bread grains factory «Produce Ce-realiere» (Bălți city) is widely known due to successful activity in milling business and in production of grain alcohol and vodka. In 1995, the intergratei plant (created in 1944) was transformed into a joint-stock company «Produce cerealiere».

Presently, the enterprise is able to process daily 250 tons of wheat and 130 tons of corn. Elevator capacities allow storing of 34 thousand tons of grains. Flour and cereals are of stable high quality. In order of production, the production of grain alcohol was arranged at the enterprise for the first time in the republic. Presently, the enterprise produces daily 1.000 decaliters of grain rectified spirit of «Lux» grade and «Extra» alcohol of the highest degree of refining suitable not only for alcohol drinks, but also for pharmaceutical production. In 2001, in order to increase profitability of the alcohol production, there were arranged the production of vodka under the «Spicul de aur» brand. Volume of production amounts to 3 thousand bottles per hour. «Spicul de aur», «Roua Moldovei», «Populara», «Hai noroc!», «Moara veche», «Nucul de aur», «Peppersky» and other special vodkas, as well as unique balsam «Nucul de aur» drawn, first of all, on grecii walnuts and 16 medicinal herbs were highly appreciated by consumers. For the time no] more than two-year period, these products were world-wide recognized and rewarded with 25 medals of different international tasting competitions. Currently, integrated plant occupies second place in the republic by volumes of alcohol sales. The integrated plant extends its activity for the account of investments into wine-making branch of the republic. Presently, on the basis of wine-making plant in Ghetlova Village, there was practically recovered the production of wine material. Integrated plant on its line carries out bottling of strong wines «Izabella», «Lidia» and «Zemfira» into 2.0 and 0.375 l PET bottles for realization on the Russian market. For the last four years, production volumes of the integrated plant had grown almost twice. In 2003, there were produced goods for 63.6 mln. lei. Joint-Stock Company «Enteh» is a general distributor, majority shareholder and strategic investor. In 2000, with the purpose of further development of multilateral profile of the enterprise, provision of stability of its activity and increase of production efficiency, there was laid foundation of the cattle-breeding complex, where formula feed and wastes from grain and alcohol production are intended to use. Today, population of pigs exceeds already 3 thousands. The staff of the integrated plant, more than 500 high-qualified specialists, proceeds with developing the economic potential of the enterprise, increasing its authority both on the domestic and foreign markets.
